

# YABEC 2008 Scientific Program

## **Opening Address** [*Chair: Ueda, Hiroshi (The University of Tokyo, Tokyo)*]

Seki, Minoru (Chiba University, Chiba)

Yoshimi, Yasuo (Shibaura Institute of Technology, Tokyo)

## **Plenary Lecture** [*Chair: Ueda, Hiroshi*]

Kondo, Akihiko (Kobe University, Kobe)

## **Oral Sessions**

[*Chair: Tan, Tianwei (Beijing University of Chemical Technology, Beijing)*]

Chang, Yung (Chung Yuan Christian University, Jhongli)

[*Chair: Wei, Yu-Hong (Yuan Ze University, Chung-Li)*]

Choi, Jeong-Woo (Sogang University, Seoul)

[*Chair: Gu, Man Bock (Korea University, Seoul)*]

Ogino, Hiroyasu (Osaka Prefecture University, Osaka)

[*Chair: Okochi, Mina (Nagoya University, Nagoya)*]

Liu, Chunzhao (Chinese Academy of Sciences, Beijing)

## **BioFun Session** [*Chair: Seki, Minoru*]

Park, Tai Hyun (Seoul National University, Seoul)

## **Announcement of YABEC 2009** [*Chair: Seki, Minoru*]

Lou, Kai (Xinjiang Academy of Agricultural Science, Xinjiang)

## **Announcement of AFOB(Asian Federation of Biotechnology)**

Park, Jung-Keug (Dongguk University, Seoul)

Koo, Yoon-Mo (Inha University, Incheon)

**Poster Flash Session A** [*Chair: Aoyagi, Satoka (Shimane University, Shimane),  
Hattori, Koji (AIST, Tsukuba),  
Yamamoto, Ken-ichiro (Waseda University, Tokyo)*]

PP-1 – PP-80

**Poster Flash Session B** [*Chair: Himi, Naoyuki (Kawasaki Medical School, Okayama)  
Kawahara, Masahiro (The University of Tokyo, Tokyo),  
Murakami, Yoshihiko (Tokyo University of Agriculture  
and Technology)*]

PP-81 – PP-156

# Contents

## Plenary Lecture

- PL-1 Kondo, Akihiko (Kobe University, Kobe)  
“Production of bio-fuels and chemicals from biomass by cell surface engineered yeast strains”

## Oral Sessions

- OP-1 Chang, Yung (Chung Yuan Christian University, Jhong-Li)  
“Anti-biofouling materials of zwitterionic polysulfobetaine studied by surface plasma resonance”
- OP-2 Choi, Jeong-Woo (Sogang University, Seoul)  
“Nanoscale biomemory device composed of self-assembled recombinant protein”
- OP-3 Ogino, Hiroyasu (Osaka Prefecture University, Osaka)  
“Development of organic solvent-stable enzymes”
- OP-4 Liu, Chunzhao (Chinese Academy of Sciences, Beijing)  
“Bioreactor technology for pharmaceutical production from hairy roots”

## BioFun Session

- BF-1 Park, Tai Hyun (Seoul National University, Seoul)  
“Biotechnology in movies”

## Poster Sessions

[Session A] (odd: 14:30-15:10, even: 15:10-15:50)

- PP-1 Bao, Jie (East China University of Science and Technology, Shanghai)  
“Industrial demonstration of fuel ethanol production using corn stover in China”
- PP-2 Cao, Hui (Beijing University of Chemical Technology, Beijing)  
“Preparation of polyaspartic acid-ethylcellulose blend hydrogel for controlled release of naproxen sodium”
- PP-3 Hung, Tsung-Sheng (University of Tsukuba, Tsukuba)  
“Integration of cell disruption and purification on a microfluidic chip”
- PP-4 Kaga, Chiaki (Nagoya University, Nagoya)  
“Design of high affinity peptides to bile acid for inhibition of cholesterol uptake”
- PP-5 Chun, Gie-Taek (Kangwon National University, Chuncheon)  
“Development of miniaturized 12-well microplate cultures for large and mass screening of itaconic acid overproducing mutants of *Aspergillus terreus* using statistically optimized production medium”
- PP-6 Chun, Gie-Taek (Kangwon National University, Chuncheon)  
“Development of exopolysaccharides high-yielding mutants through protoplast formation of *Schizophyllum commune* mycelia”

- PP-7 Chun, Gie-Taek (Kangwon National University, Chuncheon)  
 “Enhanced production of exopolysaccharides through careful control of C/N ratio of production medium and inoculum morphology in submerged mycelial cultures of *Schizophyllum commune*”
- PP-8 Sun, Yan (Tianjin University, Tianjin)  
 “5-Aminoindole: A new ligand for hydrophobic charge induction chromatography of proteins”
- PP-9 Chang, Yu-Kaung (Mingchi University of Technology, Taipei)  
 “Direct recovery of enzyme from highly crude feedstock by stirred fluidized bed contactor”
- PP-10 Chen, Shan-Yu (Yuan Ze University, Chung-Li)  
 “Exploring fermentation strategy for biosurfactant production”
- PP-11 Cao, Xuejun (East China University of Science & Technology, Shanghai)  
 “Synthesis of thermo-sensitive copolymer with incorporated hydrophobic butyl ligand and its application in lipase purification with affinity precipitation”
- PP-12 Feng, Xiaohai (Nanjing University of Technology, Nanjing)  
 “Propionic acid fermentation by *Propionibacterium freudenreichii* CCTCC M207015 with a multi-point fibrous-bed bioreactor”
- PP-13 Kajihara, Hideyuki (Kobe University, Kobe)  
 “High efficiency expression of soluble scFv in *E.coli* by use of linkers containing rare codons”
- PP-14 Okochi, Mina (Nagoya University, Nagoya)  
 “Magnetic force-based droplet manipulation system for gene expression analysis”
- PP-15 Wan, Yinhua (Chinese Academy of Sciences, Beijing)  
 “Desalination of iron dextran by nanofiltration: Concentration polarization in concentrated saline solution”
- PP-16 Xing, Xin-Hui (Tsinghua University, Beijing)  
 “Cell membrane engineering for industrial biotechnology: Control of whole-cell biocatalysis of *Pseudomonas putida* by surfactants”
- PP-17 Kim, Si Wouk (Chosun University, Gwangju)  
 “Enhancement of indirubin production using recombinant *E. coli* harboring flavin-containing monooxygenase gene”
- PP-18 Chiang, Chen-Li (Southern Taiwan University, Tainan County)  
 “Purification of recombinant EGFP proteins with new immobilized metal ion affinity chromatography magnetic absorbents”
- PP-19 Houng, Jer-Yiing (I-Shou University, Kaohsiung County)  
 “Induction of apoptosis of A549 lung cancer cell line by dehydrocostus lactone isolated from *Glossogyne tenuifolia*”
- PP-20 Gong, Fangling (Chinese Academy of Sciences, Beijing)  
 “Preparation and application of uniform poly(styrene-divinylbenzene) microspheres”
- PP-21 Li, Xiunan (Chinese Academy of Sciences, Beijing)  
 “Simultaneous chromatography quantitation of Huperzine A and B in *Huperzia serrata* with cyanopropyl stationary phase”
- PP-22 Saeki, Daisuke (University of Tsukuba, Tsukuba)  
 “Formation of water-in-oil-in-water droplets with ultra-thin oil phase layer using microfluidic device”
- PP-23 Senga, Itaru (Kobe University, Kobe)  
 “Effects of the parameters of flashing light from blue emitting diodes on astaxanthin production by *H. pluvialis*”

- PP-24 Zhang, Jing (Chinese Academy of Sciences, Beijing)  
 “Preparation of mPEG and its application in modification of protein”
- PP-25 Zhao, Jiang (Tsinghua University, Beijing)  
 “*In vitro* degradation of naltrexone-loaded PLGA microspheres in thermosensitive hydrogel matrix drug delivery system”
- PP-26 Kim, Sung-Koo (Pukyong National University, Busan)  
 “High cell density culture for the production of recombinant *E. coli* bacterial ghost vaccine against streptococcal disease”
- PP-27 Lee, Jinwon (Sogang University, Seoul)  
 “The effects of pH and succinic acid concentration on the cellular growth of *Mannheimia succiniciproducens* LPK7”
- PP-28 Hsu, Hsia-Fen (Kaohsiung Medical University, Kaohsiung)  
 “Glossogin, a novel phenylpropanoid from *Glossogyne tenuifolia*, induced apoptosis in A549 lung cancer cells”
- PP-29 Lan, Chi-Wei (Yuan Ze University, Taoyuan)  
 “Optimal decolorization of methyl orange by *Pseudomonas putida* MT2 in free suspended system”
- PP-30 Lu, Jingjing (Beijing University of Chemical Technology, Beijing)  
 “Preparative separation and purification of ellagic acid by pH-zone-refining counter-current chromatography”
- PP-31 Pan, Jiang (East China University of Science and Technology, Shanghai)  
 “Immobilization of a novel glycolate oxidase isolated from *Medicago falcata* Linn for preparation of glyoxylic acid”
- PP-32 Takahashi, Tomoki (Tokyo University of Science, Tokyo)  
 “A characteristic role of water in hydrous cellular structure on water permeability of *N*-acetyl chitosan membrane”
- PP-33 Tey, Beng Ti (Kobe University, Kobe)  
 “Heat-treatment of unclarified *Escherichia coli* homogenate improves the performance of expanded bed adsorption”
- PP-34 Liu, Chia-Chyi (National Health Research Institutes, Miaoli)  
 “Microcarrier-based Vero cell culture system for the production of enterovirus 71 vaccines”
- PP-35 Wei, Yu-Hong (Yuan Ze University, Chung-Li)  
 “Effect of trace elements on poly(3-hydroxybutyrate) production with an indigenous isolate *Vibrio spp* M11”
- PP-36 Shi, Qinghong (Tianjin University, Tianjin)  
 “Thermodynamic investigation of adsorption mechanism of lysozyme on hydrophobic charge induction chromatographic bead”
- PP-37 Sun, Jiali (Tsinghua University, Beijing)  
 “Preparation and *in vitro* evaluation of Pluronic F127 /methylcellulose-based in situ gelling delivery system for artemisinin”
- PP-38 Lee, Jong Dae (Korea Institute of Industrial Technology, Cheonan)  
 “Development of optimal production medium with mandarin peels as a carbon source for myco-protein production using improved strains of *Peacilomyces sp.*”
- PP-39 Yang, Jing-long (National Kaohsiung Marine University, Kaohsiung)  
 “Characteristic and optimized production of antioxidant retorted gelatin hydrolysate from tilapia skin”
- PP-40 Tan, Tianwei (Beijing University of Chemical Technology, Beijing)  
 “Preparation of modified chitosan-mycelium adsorbent with poly(vinyl alcohol)(PVA)”

- PP-41 Tan, Tianwei (Beijing University of Chemical Technology, Beijing)  
 “Using compound catalyst to synthesize poly(butylenes succinate) with controllable molecular weight”
- PP-42 Zhang, Qiao (Kobe University, Kobe)  
 “Efficient lactic acid production from raw corn starch using a cell surface display system”
- PP-43 Shiomi, Naofumi (Kobe College, Nishinomiya)  
 “Bioremediation of soil and water acidified by acid rain with fungi cells”
- PP-44 Jia, Lingyun (University of Dalian Technology, Dalian)  
 “Characterization of a novel polychlorinated biphenyl-degrading bacterium”
- PP-45 Nie, Kaili (Beijing University of Chemical Technology, Beijing)  
 “Enzyme catalyzed biodiesel production from waste cooking oil”
- PP-46 Kamiya, Noriho (Kyushu University, Fukuoka)  
 “Pretreatment and *in situ* enzymatic saccharification of cellulose using ionic liquids”
- PP-47 Matsumoto, Shinya (Waseda University, Tokyo)  
 “Systems microbial ecology to understand mechanisms of nitrifying granule formation”
- PP-48 Park, Jae-Kweon (Inha University, Incheon)  
 “Expression and characterization of chitinolytic enzymes in *Chlamydomonas reinhardtii*”
- PP-49 Lee, Choul-Gyun (Inha University, Incheon)  
 “Bioenergy production by photoautotrophic microalgae in bubble column photobioreactors”
- PP-50 Kim, Jeong-Dong (Inha University, Incheon)  
 “Management of harmful algal blooms using potentially alga-lytic marine bacterium *Pseudoalteromonas haloplanktis* AFMB-08041 strongly associated with the toxic dinoflagellate *Prorocentrum minimum*”
- PP-51 Yamada, Ryosuke (Kobe University, Kobe)  
 “Efficient ethanol production from raw starch by  $\delta$ -integrant polyploid fusants”
- PP-52 Lin, Chi-Wen (National Yunlin University of Science and Technology, Yunlin)  
 “Ethanol production using thermophilic cellulose-degrading anaerobes for *Pennisetum Alopecoider*”
- PP-53 Mou, Duen-Gang (Moubio Knowledge Works, Inc., Taipei)  
 “Limits to oxygen mass transfer in a simulated flask reactor vessel”
- PP-54 Miyanaga, Kazuhiko (Tokyo Institute of Technology, Yokohama)  
 “Dynamic change of microbial population through heat-alkaline treatment of excess sludge”
- PP-55 Morita, Masahiko (Central Institute of Electric Power Industry, Chiba)  
 “Removal of selenium oxyanions in wastewater by using bacterial combinations”
- PP-56 Kim, Kyoung Heon (Korea University, Seoul)  
 “Systems biological analysis of white fungi in the presence of lignocellulosic substrates”
- PP-57 Zhao, Zhouyang (Tsinghua University, Beijing)  
 “Anaerobic and integrated anaerobic-aerobic treatment for wastewater containing hard biodegradable organics”
- PP-58 Ohshima, Takayuki (Gunma University, Kiryu)  
 “PEF inactivation of blue-green algae *Microcystis aeruginosa* for water bloom prevention”

- PP-59 Rahman, Mohammad Mizanur (Kanazawa University, Kanazawa)  
 “Analysis of lipid peroxidation on *Escherichia coli* during sonodynamic sterilization in presence of TiO<sub>2</sub>”
- PP-60 Wu, Jiumn-Yih (I-Shou University, Kaohsiung County)  
 “Effect of dual-carbon substrate on cellulosic ethanol production”
- PP-61 Park, Yong-Cheol (Seoul National University, Seoul)  
 “Metabolic engineering for bioethanol production using glucose and xylose in recombinant *Saccharomyces cerevisiae*”
- PP-62 Kim, Keun (The University of Suwon, Hwaseong)  
 “Production of high concentration of ethanol from uncooked rice wine cake by simultaneous saccharification and fermentation”
- PP-63 Cao, Yihua (Osaka University, Osaka)  
 “Construction of a BAC-based chromosome physical map of CHO-DG44 cell”
- PP-64 Kanakubo, Yurie (Tokyo University of Agriculture and Technology, Tokyo)  
 “Block polymer-assisted preparation and characterization of surface-modified nanoparticle as novel carrier for drug delivery system”
- PP-65 Cha, Hyung Joon (Pohang University of Science and Technology, Pohang)  
 “Gene delivery into mammalian cells using mussel adhesive protein”
- PP-66 Cha, Wol-Suk (Chosun University, Gwangju)  
 “Effect of lavender oil on pustular acne of adolescence”
- PP-67 Okuyama, Tomoaki (University of Tsukuba, Tsukuba)  
 “Microfluidic channel for cellular micropatterning and assay of concentration-gradient-induced migration”
- PP-68 Park, Joon-Young (Osaka University, Osaka)  
 “Analysis of the structure of the *Dhfr* gene-amplified chromosomal region in CHO DR1000L-4N cell line”
- PP-69 Chang, Wen-Te (China Medical University, Taichung)  
 “Efficient production of catalpol in *Rehmannia glutinosa* hairy root culture with adsorbents”
- PP-70 Chen, Lei-Chin (I-Shou University, Kaohsiung County)  
 “Identification of effective compounds from *Glossogyne tenuifolia* (L.) Decne and investigation of their mechanisms on anti-metastatic effects on lung cancer”
- PP-71 Kanazawa, Taro (University of Tsukuba, Tsukuba)  
 “A novel clinical material complexing organic and inorganic materials improves cell adhesion and inflammation effect in vivo”
- PP-72 Kawahara, Masahiro (The University of Tokyo, Tokyo)  
 “Antigen-dependent migration of mammalian cells via an antibody/receptor chimera”
- PP-73 Gwon, Hui-Jeong (Korea Atomic Energy Research Institute, Jeonbuk)  
 “Evaluation of  $\gamma$ -irradiation on NOCMC scaffold preparation”
- PP-74 Kim, Dong-Il (Inha University, Incheon)  
 “Production of hCTLA4Ig with high-density culture of transgenic rice cells in bioreactor”
- PP-75 Wang, Pi-Chao (University of Tsukuba, Tsukuba)  
 “Constitution of renal nephron by fusion of adult glomerulia to ureteric buds with a novel scaffold under microgravity”
- PP-76 Yoshida, Chikara (Tokyo University of Agriculture and Technology, Tokyo)  
 “Tissue-adhesive hydrogel as novel surgical hemostat and matrix for sustained release”

- PP-77 Hsieh, Chien-Yan (National Kaohsiung Normal University, Kaohsiung)  
 “Effect of aeration and types of baffle on the bioactivity of *Photobacterium luminescens* in a 5L-jar fermentor”
- PP-78 Lee, Meng-Shiou (China Medical University, Taichung)  
 “Expression and characterization of Chicken Anemia Virus VP2 Protein fused with green fluorescent protein in insect cell”
- PP-79 Kim, Wook-Dong (Osaka University, Osaka)  
 “The glycosylation pattern of a humanized single-chain diabody produced by recombinant CHO cells”
- PP-80 Komuro, Syunsuke (University of Tsukuba, Tsukuba)  
 “A method to regenerate the proliferation capability of glomerular podocyte in vitro”

## [Session B] (odd: 16:50-17:30, even: 17:30-18:10)

- PP-81 Kim, Jung Gyu (Chosun University, Gwangju)  
 “Effect of aroma oils on hair growth and anti-dandruff ability”
- PP-82 Park, Jung-Keug (Dongguk University, Seoul)  
 “Reconstruction of dermal papilla like tissue employing mesenchymal stem cells by self-aggregation”
- PP-83 Takahashi, Shintaro (University of Tsukuba, Tsukuba)  
 “Micropatterned cell co-cultures on three extracellular matrix components”
- PP-84 Kitakawa-Shibasaki, Naomi (Tohoku University, Sendai)  
 “Production of human secreted alkaline phosphatase in tobacco NT1 cell immobilization cultures”
- PP-85 Lee, Wen-Chien (National Chung Cheng University, Chiayi)  
 “Seeding of human mesenchymal stem cells transduced with Notch-1 intracellular domain”
- PP-86 Sun, Yi-Ming (Yuan Ze University, Chung-Li)  
 “The response of human mesenchymal stem cells (hMSCs) and rat cerebellar granule neurons (rCGNs) to the surface characteristics of polyhydroxyalkanoate (PHA) films”
- PP-87 Maeda, Miwako (Kobe College, Nishinomiya)  
 “Effects of long chain fatty acids and carboxylates on triglyceride accumulation in animal cells”
- PP-88 Murasawa, Yusuke (University of Tsukuba, Tsukuba)  
 “G1 domain of versican, a proteoglycan, recruits hyaluronan (HA) to microfibrils”
- PP-89 Wang, Yanping (Tianjin University of Science and Technology, Tianjin)  
 “Effect of broad bean protein hydrolysates on the growth of two lactic acid bacteria species”
- PP-90 Luo, Hui (University of Science and Technology Beijing, Beijing)  
 “Fusion and expression of *Vitreoscilla* hemoglobin with spinach glycolate oxidase”
- PP-91 Dong, Jinhua (The University of Tokyo, Tokyo)  
 “Development of a novel antibody phage display system suitable for open sandwich ELISA”
- PP-92 Ueda, Hiroshi (The University of Tokyo, Tokyo)  
 “Open sandwich selection to improve the affinity of anti-peptide antibody using unconjugated osteocalcin peptide”

- PP-93 Shih, Ing-Lung (Da-Yeh University, Chang-hua)  
 “Production of poly( $\gamma$ -glutamic acid) derivative by *Bacillus subtilis* in shake flask and 10-L fermenter”
- PP-94 Soo, Po-Chi (Yuan Ze University, Chung-Li)  
 “Enhanced polyhydroxybutyrate (PHB) production via the co-expressed *phbCAB* and *vgb* genes controlled by arabinose P<sub>BAD</sub> promoter in *Escherichia coli*”
- PP-95 Xing, Jianmin (Chinese Academy of Sciences, Beijing)  
 “A product-inducible circuit inverts regulation of gene transcription for biodesulfurization”
- PP-96 Zhu, Jianguo (Nanjing University of Technology, Nanjing)  
 “Metabolic engineering of *Klebsiella pneumoniae* for co-production of 1,3-propanediol and 3-hydroxypropionate from glycerol”
- PP-97 Wang, Sheng-Shih (National Taiwan University, Taipei)  
 “Examining the effect of reducing agent on the amyloid fibril formation of alpha-lactalbumin and hen egg-white lysozyme”
- PP-98 Yu, Chi-Yang (Tatung University, Taipei)  
 “Stabilization of D-amino acid oxidase from *Rhodotorula gracilis* by immobilization onto magnetic nanoparticles”
- PP-99 Yoshimi, Yasuo (Shibaura Institute of Technology, Tokyo)  
 “Star-shaped molecularly imprinted polymer as a carrier of liquid membrane”
- PP-100 Zako, Tamotsu (RIKEN Institute, Saitama)  
 “Development of PEGylated upconversion nanophosphors as a fluorescence bioimaging probe and its application for tumor cell imaging”
- PP-101 Lei, Jiandu (Chinese Academy of Sciences, Beijing)  
 “The synthesis and screening of uniform size molecularly imprinted beads for CAP with a microfluidic reactor”
- PP-102 Wang, Xia (Shandong University, Jinan)  
 “Application of gellan gum and Fe<sub>3</sub>O<sub>4</sub> nanoparticles in degradation of carbazole”
- PP-103 Aoyagi, Satoka (Shimane University, Shimane)  
 “Development of protein orientation analysis method with TOF-SIMS”
- PP-104 Fukushima, Shizuka (Chiba University, Chiba)  
 “Diverse patterning of micro-channel surface for biologically-active modification using particle trapping and melting”
- PP-105 Chen, Chien-Cheng (National Kaohsiung Normal University, Kaohsiung County)  
 “Foam fractionation of mercury ion using biosurfactant”
- PP-106 Wu, Jau-Yann (I-Shou University, Kaohsiung County)  
 “Iridium nanoparticles modified carbon electrodes for NADH sensing”
- PP-107 Furukawa, Kazuhiro (RIKEN Institute, Saitama; Waseda University, Tokyo)  
 “Reduction-triggered fluorescence probe amplifying nucleic acids signal for the detection of intracellular RNAs”
- PP-108 Hattori, Koji (AIST, Tsukuba)  
 “Serial dilution microfluidic network composed of microchannels with high fluidic-resistance ratio for on-chip cellular assay”
- PP-109 Hwang, Sang Youn (Hanyang University, Ansan)  
 “Preparation and characterization of biofunctionalized liposome for active breast cancer cell targeting”

- PP-110 Jung, Gwoo Yeol (Pohang University of Science and Technology, Pohang)  
 “Quantitative pathogen detection method by capillary electrophoresis-single strand conformation polymorphism based on multiplex RT-PCR via template-tagging”
- PP-111 Ninomiya, Kazuaki (Kanazawa University, Kanagawa)  
 “Evaluation of sonocatalytic cytotoxicity of cancer cells with incorporation of TiO<sub>2</sub> nanoparticles”
- PP-112 Yamamoto, Ken-ichiro (Waseda University, Tokyo)  
 “Characterization of hemodialysis membrane surface by atomic force microscopy”
- PP-113 Chen, Chien-Hsien (Tatung University, Taipei)  
 “Enhancing the PCR efficiency of adenovirus diagnosis using gold nanoparticles”
- PP-114 Chen, Chien-Yen (National Chung Cheng University, Chiayi)  
 “Synthesis of bio- and chemical surfactant mediated zinc oxide nanoparticles and their photoluminescence property”
- PP-115 Ikeno, Shinya (Kyushu Institute of Technology, Fukuoka)  
 “High-sensitivity homogeneous affinity sensor based on electrochemical luminescence”
- PP-116 Imanaka, Hiroyuki (Okayama University, Okayama)  
 “Controlled immobilization of biomolecules by cushion protein on solid surfaces”
- PP-117 Kim, Eun-ki (Inha University, Incheon)  
 “A small molecule inhibitor of Mitf-E-box binding and its depigmenting effect in B16 melanoma cells”
- PP-118 Park, Jee-Woong (Korea University, Seoul)  
 “Selection of ssDNA aptamers for the adipokines using FluMag-SELEX”
- PP-119 Mihashi, Masaki (Chiba University, Chiba)  
 “Development of microfluidic devices for enzymatic diagnosis of inborn metabolism errors”
- PP-120 Miyachi, Yusuke (Kobe University, Kobe)  
 “New SELEX strategy for screening of DNA aptamer by AFM”
- PP-121 Li, Yaw-Kuen (National Chiao Tung University, Hsinchu)  
 “A breakthrough in silicon-nanowire-base biosensor: Detection of non-charged steroids”
- PP-122 Wang, Shih-Han (I-Shou University, Kaohsiung County)  
 “An electrodeposited nano-gold electrode for amperometric immunosensing”
- PP-123 Ishii, Jun (Kobe University, Kobe)  
 “Mutational analysis for extracellular loop-2 of human somatostatin receptor by yeast-based fluorescence signalling assay”
- PP-124 Kumada, Yoichi (Kyoto Institute of Technology, Kyoto)  
 “Orientation control of monoclonal antibodies by use of polystyrene binding peptide (PS-tag)”
- PP-125 Gu, Man Bock (Korea University, Seoul)  
 “Aptamer technologies for detection and control of EDCs, antibiotics & residual pharmaceuticals”
- PP-126 Lee, Su Jin (Korea University, Seoul)  
 “Colorimetric detection of antibiotics using ssDNA aptamer conjugated gold nanoparticles”
- PP-127 Lee, Su Jin (Korea University, Seoul)  
 “Rapid and simultaneous detection of food microbial pathogen using DNA chip”

- PP-128 Shiritani, Yuki (Kyoto Institute of Technology, Kyoto)  
 “Adsorption characteristics of PS-tag-fused protein onto hydrophilic and hydrophobic polystyrene plates”
- PP-129 Sugiura, Shinji (AIST, Tsukuba)  
 “Perfusion culture microchamber array chip with independent perfusion channels for parallel drug cytotoxicity assay”
- PP-130 Guo, Chen (Chinese Academy of Sciences, Beijing)  
 “Magnetic ionic liquids for lipase immobilization: Esterification catalysis”
- PP-131 Jiang, Pei-Xia (Tsinghua University, Beijing)  
 “Molecular cloning of *vio* genes and their expression in *Pseudomonas putida* for efficient production of violacein and deoxyviolacein”
- PP-132 Kim, Dong-Myung (Chungnam National University, Daejeon)  
 “Synthesis of functional proteins using bacterial translation machinery entrapped in gel matrices”
- PP-133 Kim, Jong Soo (Chonbuk National University, Jeonju)  
 “Optimization of fermentation conditions for production of microbial-transglutaminase (MTG) from four *Streptomyces* sp.”
- PP-134 Chang, Chun-Sheng (Southern Taiwan University, Tainan county)  
 “Effect of alkyl chain length on the enantioselectivity of *Carica papaya* lipase in the kinetic resolution of 2-methylalkanoic acids”
- PP-135 Chen, Shu-Jen (National Kaohsiung University of Applied Sciences, Kaohsiung)  
 “Fermentation method for producing high concentration hyaluronic acid by *Streptococcus zooepidemicus* ATCC39920”
- PP-136 Matsuda, Tetsuya (Kobe University, Kobe)  
 “Construction of an *Aspergillus oryzae* cell-surface display system using the putative GPI-anchored protein”
- PP-137 Moniruzzaman, Muhammad (Kyushu University, Fukuoka)  
 “Biocatalysis in a water-in-ionic liquid microemulsion”
- PP-138 Baik, Sang-Ho (Chonbuk National University, Jeonju)  
 “Synthesis of *L-threo*-3,4-dihydroxyphenylserine by continuous high density whole cell biocatalyst of recombinant *L-threonine* aldolase”
- PP-139 Lou, Kai (Xinjiang Academy of Agricultural Sciences, Xinjiang)  
 “Diversity of the enzyme-producing halophilic actinomycetes from mud volcano in Xinjiang”
- PP-140 Ren, Lujing (Nanjing University of Technology, Nanjing)  
 “Analysis and regulation of NADPH supply system on docosahexaenoic acid fermentation by *Cryptocodium cohnii*”
- PP-141 Ogino, Hiroyasu (Osaka Prefecture University, Osaka)  
 “Enhancement of aspartame precursor synthesis activity of an organic solvent-stable protease”
- PP-142 Kim, Seung Wook (Korea University, Seoul)  
 “A novel enzyme-immobilization method for bioelectrical property”
- PP-143 Kim, Yong Hwan (Kwangwoon University, Seoul)  
 “A novel route for immobilization of protein to silica particles through protein/silicification domain chimera”
- PP-144 Chien, Chih-Ching (Yuan Ze University, Chung-Li)  
 “Cloning and expression *phaCAB* of *Bacillus megaterium* in *Escherichia coli* for PHA production”

- PP-145 Hou, Shao-Yi (National Taipei University of Technology, Taipei)  
 “Construction of cellular adsorbents for dioxin binding using linear transformation and site-specific recombination”
- PP-146 Wang, Limin (Chinese Academy of Sciences, Beijing)  
 “Studies on the characteristics of linoleate isomerase from *P. freudenreichii* ssp. *shermanii* and *L. plantarum*”
- PP-147 Wang, Zheng (Beijing University of Chemical Technology, Beijing)  
 “High cell density fermentation of *Saccharomyces cerevisiae* for selenium-enriched yeast production”
- PP-148 Koo, Yoon-Mo (Inha University, Incheon)  
 “Lipase-catalyzed synthesis of fatty acid sugar ester in ionic liquids”
- PP-149 Lee, Jung Heon (Chosun University, Gwangju)  
 “Development of magnetically separable nanoparticle lipase for transesterification of vegetable oil to biodiesel”
- PP-150 Lee, Jung Heon (Chosun University, Gwangju)  
 “Ethanol enrichment with magnetically separable polyaniline nanofiber(PAMP)”
- PP-151 Hung, Chih-Hsin (I-Shou University, Kaohsiung County)  
 “Optimal conditions for *Edwardsiella tarda* lytic phage infection and preservation”
- PP-152 Too, Jui-Rze (Da-Yeh University, Chang-hua)  
 “Study on cultivation conditions of *Aeromonas hydrophila* Too12 to produce N-acetylchitooligosaccharides”
- PP-153 Xu, Jianhe (East China University of Science and Technology, Shanghai)  
 “Discovery and utilization of lactonase for chiral synthesis”
- PP-154 Zhao, Shuxin (Tianjin University of Science and Technology, Tianjin)  
 “Antibiotic compounds from *Monascus*”
- PP-155 Park, Joong Kon (Kyungpook National University, Taegu)  
 “Production and structural feature of bacterial cellulose using nano-bubble system”
- PP-156 Shin, Hyun-Jae (Chosun University, Gwangju)  
 “Purification and characterization of fibrinolytic enzyme from *Pleurotus eryngii*”
