**THE 30<sup>TH</sup> SYMPOSIUM FOR  
YOUNG ASIAN BIOLOGICAL ENGINEERS' COMMUNITY (YABEC)**

**YABEC-2025**

**19-21 | NOV | 2025**

Kunibiki Messe in Matsue city  
(Shimane Prefectural Convention Center)

1 Chome-2-1 Gakuenminami, Matsue, Shimane 690-0826

**Important dates**

**Registration and Abstract deadline  
30 SEPTEMBER 2025**

We invite you to the 30th YABEC, which will be held on 19-21 November (Wed – Fri) November 2025 in Kunibiki Messe, Matsue, Japan.

YABEC has grown into a highly respected tradition within the Asian Federation of Biotechnology (AFOB) and the broader biological engineering communities across Asia. The conference has consistently provided a platform for young professionals and scholars in biological engineering from various Asian countries and regions to present their groundbreaking research, exchange innovative ideas, create lasting social networks, and promote collaborative international research efforts.

As we celebrate the 30th anniversary of YABEC this year, we are especially proud of the achievements made over the past three decades. The upcoming YABEC 2025 conference will be hosted at Kunibiki Messe in Matsue, Japan, where we will reflect on this remarkable journey and look forward to the future of biological engineering.

YABEC2025 will offer a unique opportunity to exchange the latest advancements in bio big data, AI, and high-throughput, high-precision, and computational technologies that continue to reshape the field of biological engineering. It is our hope that, through this celebration of past achievements, we can inspire new ideas and collaborations for the years to come. We eagerly anticipate the exciting and enriching experiences that await us during this milestone event.

**YABEC 2025 HP**

Supported by  
Asian Federation of Biotechnology (AFOB)  
The Society of Chemical Engineers, Japan (SCEJ)

Organized by  
YABEC 2025 Organizing Committee

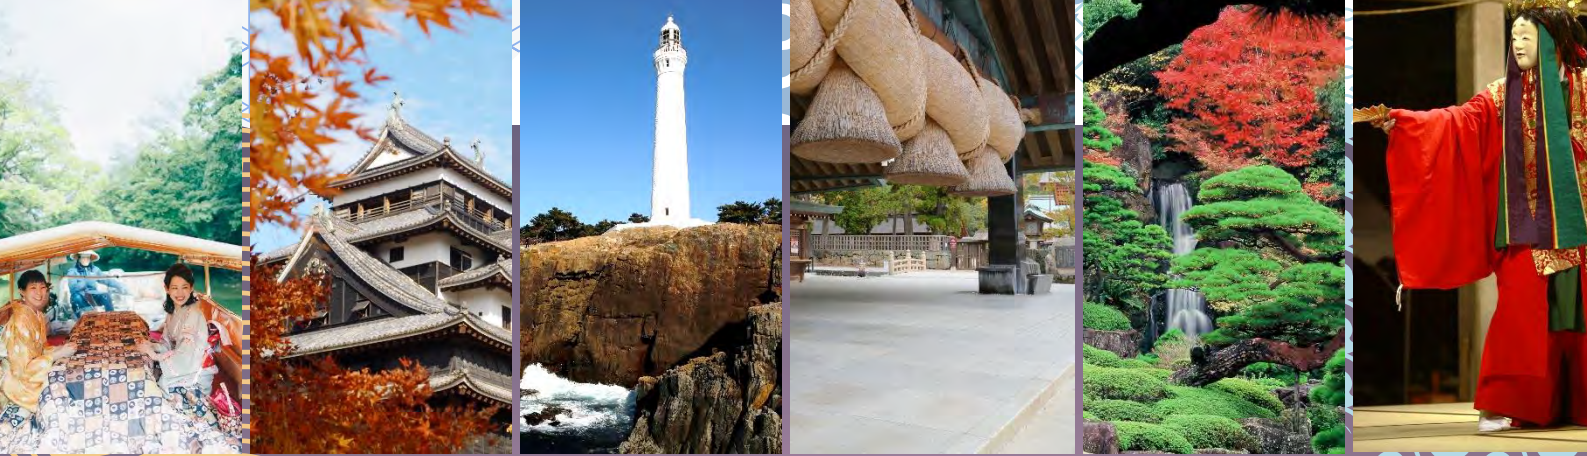

**KUNIBIKI MESSE  
IN MATSUE CITY**

**KNOW MORE  
ABOUT MATSUE CITY!!**

YABEC 2025 will be held in **Matsue**, a historic city in **Shimane Prefecture**, Japan, renowned as the "City of Water."

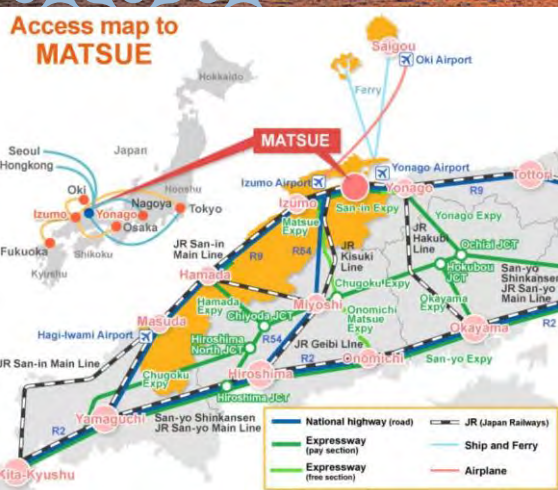

November is regarded as a special month in Japanese mythology and is called "神無月" (the month when the gods are absent).

According to ancient Japanese myths, during this time, the gods from various regions of Japan would gather at the Izumo Taisha, considered the central sanctuary of the gods in Shimane Prefecture, to reflect on the events of the past year and hold discussions to plan for the coming year. Thus, in other parts of Japan, November was referred to as "神無月" the "month when the gods are not present."

In essence, **Shimane Prefecture**, the host of YABEC2025, was seen as the venue for the gods' "convention."

It is truly a remarkable and auspicious occasion to host young professionals and scholars who support biological engineering communities in such a significant location. We cordially invite you to join us in celebrating the 30th anniversary of YABEC and engage in meaningful discussions about the future of biological engineering in this historically rich setting.

**Details will be updated in YABEC 2025 HP!**

YABEC 2025 Organizing Committee:

Prof. Ryuji Kato  
(Nagoya University)  
Regional delegate of Japan  
Chair of Symposium

Prof. Hiroyuki Imanaka  
(Okayama University)  
Secretary in general

Prof. Masaaki Konishi  
(Kitami Institute of Technology)

Prof. Masumi Yamada  
(Chiba University)
